

TCG Chaos Inventory

Forxia Industries Corp.
Product features & roadmap · August 2026

AVAILABLE TODAY — INTAKE & STAGING

- ManaBox (and compatible) CSV upload after counter scanning
- Staging review before inventory goes live
- Automatic block breakdown by target card count
- Position-indexed intake — every card keeps pile order
- Formalize into numbered blocks with shelf/bin assignment
- Undo an entire import in one action
- Large imports validated at 5,000+ cards
- Pending queue, upload logs, status badges

AVAILABLE TODAY — BULK INVENTORY

- Block IDs (MTG-0001, ...) with shelf → bin → block hierarchy
- Lifecycle: open, sealed, picked, liquidated
- Move blocks; seal individually or in bulk
- Capacity hints; block notes
- Full activity / audit log

AVAILABLE TODAY — CATALOG & PICKING

- Scryfall enrichment; condition, foil, language
- Mana Pool order import
- Location-sorted pick lists; picked / short / substitute
- Position renumber after picks; counter pick from one block
- Hold pick lists; quarantine blocks for repair
- TCGplayer pullsheet upload; pick history & metrics
- Correction workflow for bad scans

AVAILABLE TODAY — ANALYTICS & PLATFORM

- Block age dashboard, aging buckets, stale block list
- Search by block ID
- Mana Pool listing CSV export per block
- JSON backup and full restore
- Self-hosted Docker + PostgreSQL — your data, no commission

Dollar-based valuation reports await pricing persistence (in progress).

IN PROGRESS

- Market prices saved on inventory (valuation currently \$0)
- Search by card name across all blocks
- Global quantity by card
- Bulk block transfer between locations
- Secure webhooks and scheduled job authentication

TWO INVENTORY MODES

	Bulk / chaos	Sorted stock (planned)
Best for	Trade-ins, bulk lots	Listed singles
Address	Block + position	Shelf / SKU
Online singles	No — pick from brick	Yes — live qty sync

COMPLETED PHASES

Phase	Delivered
1 — Platform	Docker stack, settings, backup/restore, Mana Pool CSV export
2 — Staging	CSV → staging → review → formalize (5,000+ cards/import)
3 — Lifecycle	Seal, guarded removal, undo formalize, activity log
4 — Picking	Mana Pool orders, pick lists, counter pick, hold/quarantine

PLANNED ROADMAP

Phase	Delivers	Shop outcome
5 — Polish	Card search, global qty, pricing fix, bulk moves	Complete chaos-mode product
6 — Foundation	Staff login, SKU ledger, sort-to-stock, promote, reservations	Sellable singles + audit trail
7 — Games & scan	Pokémon + TCGs, printing picker, price overlay, camera	Multi-game; faster review
8 — Autopricing	Rule engine, refresh, per-channel prices, bulk reprice	Hands-off pricing
9 — Channels	Marketplace sync, CSV templates, oversell guard	Multi-channel without double-selling
10 — Counter	POS, store credit, buylist offers & payout	In-store retail + trade-in
11 — Shipping	Unified orders, labels, tracking, returns	One fulfilment workflow

Minimum viable full shop: Phases 6–10 (login, sellable stock, pricing, channels, counter POS).

WHO IT'S FOR

Shop type	Fit
Trade-in / bulk heavy	Strong fit today
Online singles seller	After Phases 6–9
Full retail + counter	After Phases 10–11
Multi-location chain	Single store first; SaaS later

FUTURE (NOT SCHEDULED)

- Consignment & consignor portal
- Advanced sales, margin & channel reporting
- Customer kiosk; events/tournaments
- Native mobile app; public API
- Multi-store SaaS hosting
